

MECs Implemented Activities in mid-February and early March 2020 !

- The first Tanzania eCook Book; English Version was prepared and the final draft was produced. Thanks to Dr. Anna Felicity, Jacob and MECs team at Loughborough for the constructive inputs to improve the book. The book was submitted to MECs for comments and thereafter publication approval. Translation for the Swahili Version is on progress. The final project draft report has also been submitted for publication approval.

- TaTEDO participated as invited guest to Energy development partners (E-DPs) meeting which was co-organized by UNDP and JICA in Dar es Salaam. The meeting was held on 13th February 2020 and the current eCook initiatives under the support of MECs were presented. Positive and supportive compliments for these initiatives were provided by development partners whereby they called upon for more efforts in awareness creation to ensure majority of the population switch from traditional to clean cooking solutions.

Presentation of TaTEDO works including eCook initiatives to E-DPs in Dar es Salaam

- A total of 120 EPC electric pressure cookers were supplied to different clients in mid-February to early March 2020 including 97 pieces to A2EI for their mini-grid projects around the Lake Zone Areas.
- Awareness raising events were organized and participated;
 - Live demonstrations conducted to staff at the headquarters of the largest Bank in Tanzania, National Microfinance Bank (NMB), financing institution have vital role in supporting the actors along the EPC market chain (suppliers, distributors)
 - Demonstration was done at TaTEDO offices to visitors (Organizations and companies) from Rwanda who came to learn and share experience on renewable energies and clean cooking solution. It has created awareness and stimulate immediate demand which will lead into agreement of supplying EPC.
- Relevant Government Ministries and different Departments were visited for meetings and discussions on EPCs in Dodoma. These included Ministry of Energy, President Office – Regional Administration and Local Government Authorities (PRO RALG), Rural Energy Agency (REA), and Energy and Water Utilization Regulatory Authorities (EWURA). The focus of the discussions were on how the government can create and provide enabling environment through supportive policies that will facilitate increased dissemination of EPCs.
